

Collecting Feedback

from teachers.

(Attach this feedback to the corresponding test/survey of the class)

Partner organization: WSBINOZ (Poland)

Teacher's name: Daniela Kuca

1. Where the activities useful, easy to understand and implement?

The exercises included in the ToolKit were very helpful. Most of the exercises were not difficult to carry out, did not take too much time and did not require the preparation of additional materials. However, there were also those that required more space and consumed more time, such as "Desert island", "Common heads", "Group class".

2. Did you find any difficulties or doubts during the implementation?

Piloting was smooth, in case of doubt I directed questions to the project coordinator, obtaining explanations and help. Due to the large number of free days (Christmas break and winter holidays), there was not enough time to carry out several exercises.

3. Have you observed changes in the dynamic of the class after the implementation?

Describe what type of changes.

Students are more aware of their strengths and weaknesses, they communicate better, work better together, understand their emotions and know how to deal with them, they can relax.

4. How did your students react to the activities in general?

Students willingly participated in the proposed exercises. They felt joy and satisfaction with what they do. They were active, creative and willing to cooperate.

5. What suggestions would you give us to improve the manual?

Some exercises were too difficult for this age group, eg FECE. Some exercises required more space and took a lot of time.

Remark: FECE is in the section for parents not students.

6. Any other significant observations you would like to add.

Lack of answers.
